

**Nurvinox 4-ADPA**  
Intermediate**Technical Data Sheet**

CHEMICAL NAME: 4-Aminodiphenylamine

Mainly used in dyes and additives intermediate, antioxidant 4020NA, 4020 /6PPD and other dominating antioxidants, producing blue salt RT, acid red GR, disperse Yellow GFLA. It is toxic, with a strong irritant.

| <b><u>PRODUCT SPECIFICATIONS</u></b> |           |  |
|--------------------------------------|-----------|--|
| Appearance:                          |           | Grey to purple brown solid   |
| Purity (GC)                          | (%) min.  | 99.0   |
| Melting Point                        | (°C) min. | 70.0   |
| Solidifying Point                    | (°C) min. | 71.5   |
| Ash                                  | (%) max.  | 0.12   |
| <b><u>PACKAGING:</u></b>             |           |  |
| Bag:                                 |           | 20/25kg paper bag with PE Inlay or other package<br>(500Kg/1000Kg) as per customers' requirement |
| Pallet                               |           | 600Kg/pallet   |

Shelf Life: 12 monthes
