

**Nurcagran® 60****Mixture of light coloured, aliphatic hydrocarbon resins****Technical Data Sheet****CORRESPONDING TRADEMARK**

Ultra blend 6000; 60NSF; Rhenosin 260; Homogenisator 602

**PRODUCT DESCRIPTION**

Nurcagran® 6000 is a non-staining homogenizer that improves the homogeneity of polymer blends of different polarities and different viscosities.

It also increases green tack of rubber compounds by showing some synergism with tackifying resins.

Due to its light colour, Nurcagran® 6000 is recommended for white and coloured compounds.

**TYPICAL PROPERTIES**

Appearance:		Yellow pastilles
Ash Content	(%) max.	0.5
Softening point	(°C)	95-105
Density	(g/cm <sup>3</sup> )	1.0-1.2
Storage Stability		At least 2 years under normal conditions

**DOSAGE**

2 to 5 phr

**PACKAGING**

25 kg paper bag with PE-Inlay
